

n°rdweld® | TLC

**MANUFACTURER OF TANK BUILDING SYSTEM  
& WALKWAY SYSTEMS**

**Nordweld Tank Building System** is an innovative technology for building atmospheric and pressured tanks. Our system is made for building of tanks with a diameter of 8 to 50 meters and a weight of up to 700 tons. All components are stored and transported in 20ft HC Shipping containers.

30 - 60%

**30-40%  
savings**

if you use

**Standard  
system**

Pre-rolled plates,  
mechanized welding

**40-60%  
savings**

if you use

**Advanced system  
with Wheel Trolley**

More efficient, mechanized welding,  
rolling on site using plates or coils

Nordweld is not only tank **construction equipment available for sale & rental**, but also team that will build tanks according to your plan. **If you need an erection team, contact us!**

**ERECT**

Technology offers the possibility to perform **all work at ground level**. By starting with the roof, it makes a good weather protection and keep the roundness of the tank during the building process. The tank is rotating during welding progress and the installation of the sheets. All welding can be mechanized and preform from one point acc. to the customer's request.

- **High efficiency** - less man hours compared to traditional tank building methods
- **Cost reduction** - no onsite crane required and scaffolding costs eliminated
- Roll all shell material on site
- **Safety** - all work is done from one location at ground level and can be performed in limited workspaces
- Efficient transportation system in 20ft HC shipping container
- All parts of the system are made of high-quality materials and components
- Designed to work in tough environmental conditions

## TANK STORAGE AWARDS

Nordweld was awarded the Tank Storage 1st prize for “Innovative Technology”, at the exhibition 2023.

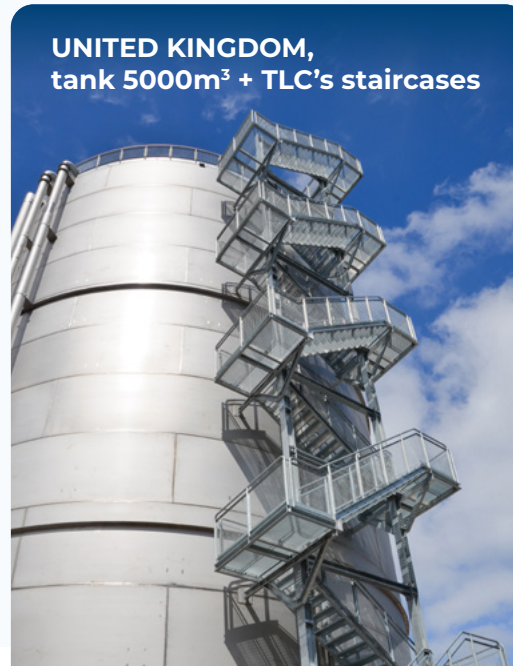

URUGUAY, 11 tanks 920-5700m<sup>3</sup> + TLC'S communication system

MEXICO, 4 tanks 8500m<sup>3</sup>

BELGIUM, 2 tanks 6500 m<sup>3</sup>

UNITED KINGDOM, tank 5000m<sup>3</sup> + TLC's staircases

BRAZIL, 2 tanks 10 000 m<sup>3</sup>

## PRODUCER OF STAIRS, STEEL CONSTRUCTIONS, PLATFORMS AND WALKWAY SYSTEMS

**Walkway systems** are a reliable construction that allow for safe access to tank's roof. Modern solutions and well-thought out system of fixings guarantee safety of users.

The walkway systems consist of:

- Staircases
- Spiral stairs
- Helicoidal stairs
- Technical ladders
- Steel platforms, landings and walkways
- Railings and balustrades
